Babysitter's Safety Course

Have you ever thought of owning your own business?

Why wait until your older – Start now!

This course will teach you how to set up your own babysitting business, provide some practical babysitting safety applications, and share with you fun games to use to pass the time while sitting.

Babysitting is not just “**watching**” children, but being responsible for their safety and well-being. When you are caring for a child, you are taking care of a parent’s most cherished treasure. Everything in their home and your home can be replaced – everything that is, except a child. Babysitting is a **BIG** responsibility.

We have heard on the news several times about young teens saving the life of siblings, or friends, with the use quick thinking based on their safety training. This class will be a hands on, educational and a fun filled experience for future babysitters. You will come out of the course with great lifesaving skills that will stay with you for the rest of their lives. These skills will provide you with the confidence needed to start your own business which is worth its weight in gold.

Parents appreciate the fact that you, “as a babysitter,” take your job serious enough to take a class that will teach you; basic first aid, controlling bleeding, choking, rescue breathing and many other skills for infants as well as children care. This will make them feel safe leaving you with their children.
